Burgenland: Neusiedlersee-Hügelland

Size & Location: 3,900 ha/9600 acres. Western shore of the Neusiedlersee (Lake Neusiedl).

Important Villages: Rust, Leithagebirge, Oggau, Mörbisch, Zagersdorf, Eisenstadt and Pöttelsdorf.

Soil Types: Higher composition of loam around Eisenstadt. Slopes of Leithagebirge are highly calcareous and rich with soils of mica schist and chalk.

Varietals & Style: Grüner Veltliner, Riesling, Pinot Blanc, Pinot Gris, Ausbruch, Sauvignon Blanc, Chardonnay, Welschriesling Eiswein, Cabernet Sauvignon, Pinot Noir, Blaufrankisch and Zweigelt.

Climate: Oggau, Rust and Mörbisch - moderate temperatures, reflection of sunlight and high autumn humidity help create aromatic white wines and very mature red wines.

Important Facts

- Three distinct areas of viticulture, designated by Village, within this district:
  1. **Leithagebirge** - mineral rich soils, racy white wines with great acidity.
  2. **Oggau, Rust and Mörbisch** - ideal for botrytized wines because of the humidity from the lake.
  3. **Zagersdorf and Pöttelsdorf** - ideal conditions for Blaufränkisch.
- **Producers of Note**: Botrytis specialist: Feiler-Artinger, Schandl, Hiedi Schrock, Triebaumer, and Wenzel. Dry white wines: Kollwentz, Prieler, and Schuster.
